

Home Buying Command Center

One working system for a decision that mixed suburb data, contracts, inspections, valuations, money and taste.

COMPARE

INSPECT

RESEARCH

DECIDE

One decision, five connected workspaces

The top-level view joined property comparison, money, criteria, research and source documents instead of leaving them across tabs and spreadsheets.

PROPERTY COMPARISON

Compare shortlisted homes before and during inspections.

Use this as the mobile-friendly view for scores, space, reports, floorplans, photos, and inspection criteria. The comparison matrix remains the source of truth.

Hard cap

\$950k FHBG

Minimum

3 bed / 2 bath

Property type

Freestanding

Preferred feel

Newer, compact land

01

Run today

Inspection agenda, stop-by-stop checklists, and debrief prompts.

02

Compare properties

Scores, space bands, photos, floorplans, reports, and next actions.

03

Check money

Bid-price repayment scenarios and first-home buyer benefit logic.

04

Inspect well

Hard rejects, daily-life fit, storage, light, outdoor, and legal checks.

05

Read documents

Open Markdown reports and source CSVs in a browser-friendly layout.

Preferences became a repeatable checklist

The tool translated what mattered in daily life into prompts I could use while walking through a property, when memory and first impressions are both unreliable.

CRITERIA

Inspection-ready checklist

This is arranged for walking through a property on a phone: first reject obvious mismatches, then check the spaces that matter most for daily life.

Immediate Rejects

- ☐ Not a freestanding house, including X/Y unit or townhouse-style addresses.
- ☐ Above the \$950k FHBG hard cap.
- ☐ Less than 3 bedrooms or less than 2 bathrooms.
- ☐ Shared driveway, body corporate, or unclear own-title frontage.
- ☐ Routine 1970s-1990s compromise unless the layout and condition are exceptional.

Daily-Life Fit

- ☐ Real study, upstairs retreat, or a bedroom that can work as a comfortable office.
- ☐ Spacious master with WIR preferred over just BIR.
- ☐ Ensuite should feel usable, not just technically present.
- ☐ Kitchen has deep storage, pantry/WIP, bench runs, and sensible appliance placement.
- ☐ Secondary bedrooms share a good bathroom without awkward access.

Storage And Utility

- ☐ Separate laundry with enough room to actually use it.
- ☐ Linen cupboard or walk-in linen, not just incidental shelves.
- ☐ Under-stair, garage, pantry, and robe storage checked physically.
- ☐ FTTP NBN preferred for WFH reliability.
- ☐ Garage/car space works for current car plus storage needs.

Light And Comfort

- ☐ North-facing or bright main living is a meaningful plus.
- ☐ Bedroom windows are large enough to make rooms feel open.
- ☐ Check west-facing rooms for summer heat exposure.

Outdoor Fit

- ☐ Covered attached alfresco is valuable.
- ☐ Open decks and detached outdoor areas are lower priority.
- ☐ Large lawns are a maintenance burden, not a benefit.
- ☐ Compact land around 300-550m2 is

Inspection Checks

- ☐ Cracks, water stains, soft cabinetry, sticking doors/windows.
- ☐ Tap pressure, toilet operation, roof/gutter condition.
- ☐ Switchboard age, hot-water age, heating/cooling type.

Suburb data sat beside the lived question

Economic indices, density, median prices and corridor context became comparable without pretending that a suburb score could replace seeing a place in person.

Where to look first

AllNewer HomesLand ValueH&L

Highton

Cat AGeelong track\$863.5k

IRSAD D9

Data-backed suburb-quality leader: IRSAD decile 9, IEO decile 9, low crime signal, strong education profile, and the best qualitative character from the Geelong visit.

Best useBest suburb quality

Taylors Hill

Cat AWestern corridor\$885k

IRSAD D8

Strong family/affluence profile: young median age, high household income, IER decile 9 and very low calculated 2025 crime incident signal.

Best useUpgrade search

Taylors Lakes

Cat AWestern corridor\$945k

IRSAD D8

High owner-occupier, high economic-resources and strong established-house growth. Watch affordability because the median is already near the FHBG cap.

Best useEstablished wealth

Caroline Springs

Cat AWestern corridor\$743.5k

IRSAD D7

Solid family and amenity profile with lake/town-centre convenience, but weaker growth and ownership data than Taylors Hill or Taylors Lakes.

Best useAmenity fallback

Mill Park

Cat A65-75 min\$785kIRSAD D5

Still valid because of budget and north-side strategy, but the suburb data is middle rather than premium. Pursue only when the house itself is excellent.

Best useProperty-led target

Belmont

Cat BGeelong track\$700k

IRSAD D6

Good education/occupation profile and Geelong convenience, but lower economic-resources score, higher renter share, and higher crime signal than Highton.

Best useStreet-by-street

HOME BUYING COMMAND CENTER

04

AI did not pick the house. It gave judgment somewhere to live.

The useful shift was from collecting facts to maintaining a decision: evidence could accumulate, contradictions could stay visible, and every inspection could change the model.

01

Research

Suburb, market and property evidence in one place.

02

Interpret

Contracts, valuations and inspection findings made comparable.

03

Decide

Hard filters and softer preferences held together without collapsing into one score.
