

Wheel or Wire Total Cost

An editable model for asking when a car makes sense, once finance, running costs, resale and money leaving a mortgage offset all count.

[EDIT THE ASSUMPTIONS](#)

[COMPARE BY YEAR](#)

[PRICE THE PREMIUM](#)

The visible price was only the beginning

The tool put finance incentives next to range, battery, charging and warranty, with the current total-cost answer kept in sight.

AUSTRALIAN EV DECISION MODEL · MARKET DEFAULTS 13 AUGUST 2026

Comfort value,
or future-proof
hardware?

Put Geely's subsidised finance against BYD's larger battery,
faster charging and assumed resale advantage—without losing
sight of your 6.3% mortgage offset.

CURRENT 5-YEAR RESULT

Geely EX5 Inspire
\$7,530 lower total cost

Change the assumptions that matter

Ownership period, distance, energy, finance terms and offset-account logic were editable rather than hidden behind the result.

SAVE SCENARIO

01 / MODEL THE DEAL

Change the assumptions that matter.

The defaults are deliberately editable. Drive-away quotes, insurance and the actual finance contract should replace market estimates before you commit.

Shared assumptions
Both vehicles use the same ownership and driving pattern.

OWNERSHIP PERIOD

5years

DISTANCE DRIVEN

12000km / yr

BLENDED ELECTRICITY

\$ 0.3 / kWh

HOME-LOAN OFFSET

6.3% p.a.

COST INFLATION

3% / yr

☐ LOAN REPAYMENTS LEAVE THE OFFSET ACCOUNT
Leave off when repayments come from future income.

G

Geely EX5 Inspire

COMFORT-LED · PROMOTIONAL FINANCE

\$49,500

B

BYD Atto 3 EVO Premium

TECHNOLOGY-LED · STANDARD GREEN LOAN

\$50,000

Price the technology premium

The result separated total ownership cost from monthly repayment, finance cost and expected resale, so a cheaper payment could not impersonate a cheaper car.

The question changed from which car is cheaper to when each car makes sense.

A five-year answer is still built from uncertain inputs. Making those assumptions visible meant I could stress-test the result, then decide whether comfort, range or technology was worth the premium.

01

Model

Finance, energy, servicing, insurance, registration and tyres.

02

Include capital

Resale plus the opportunity cost of taking cash out of the home-loan offset.

03

Return to taste

See the financial gap clearly, then decide whether the lived difference earns it.
